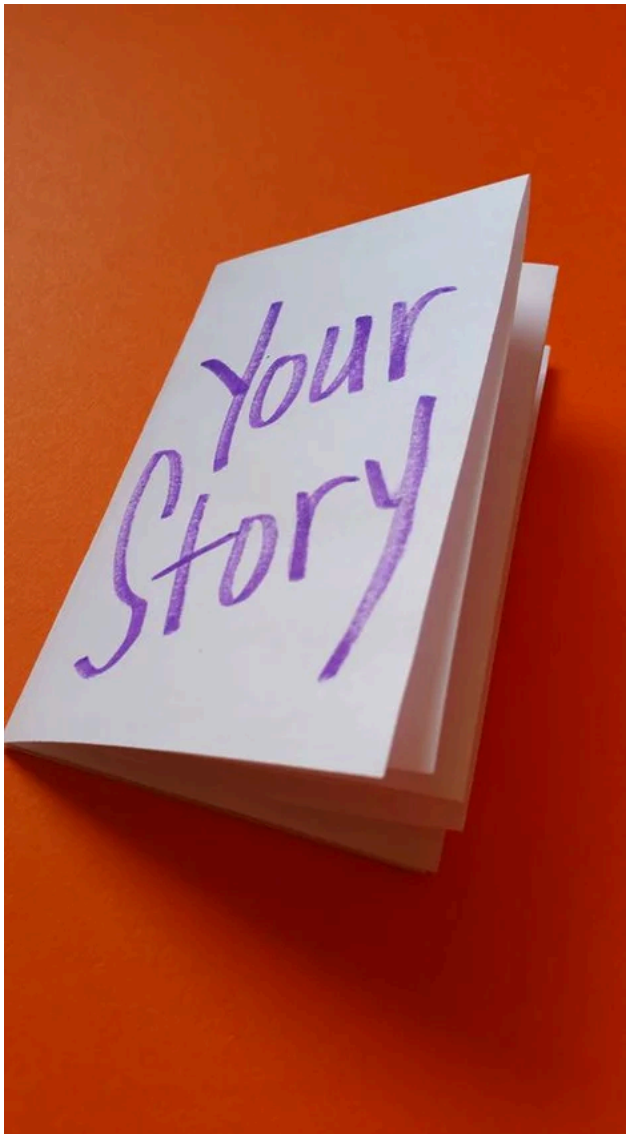
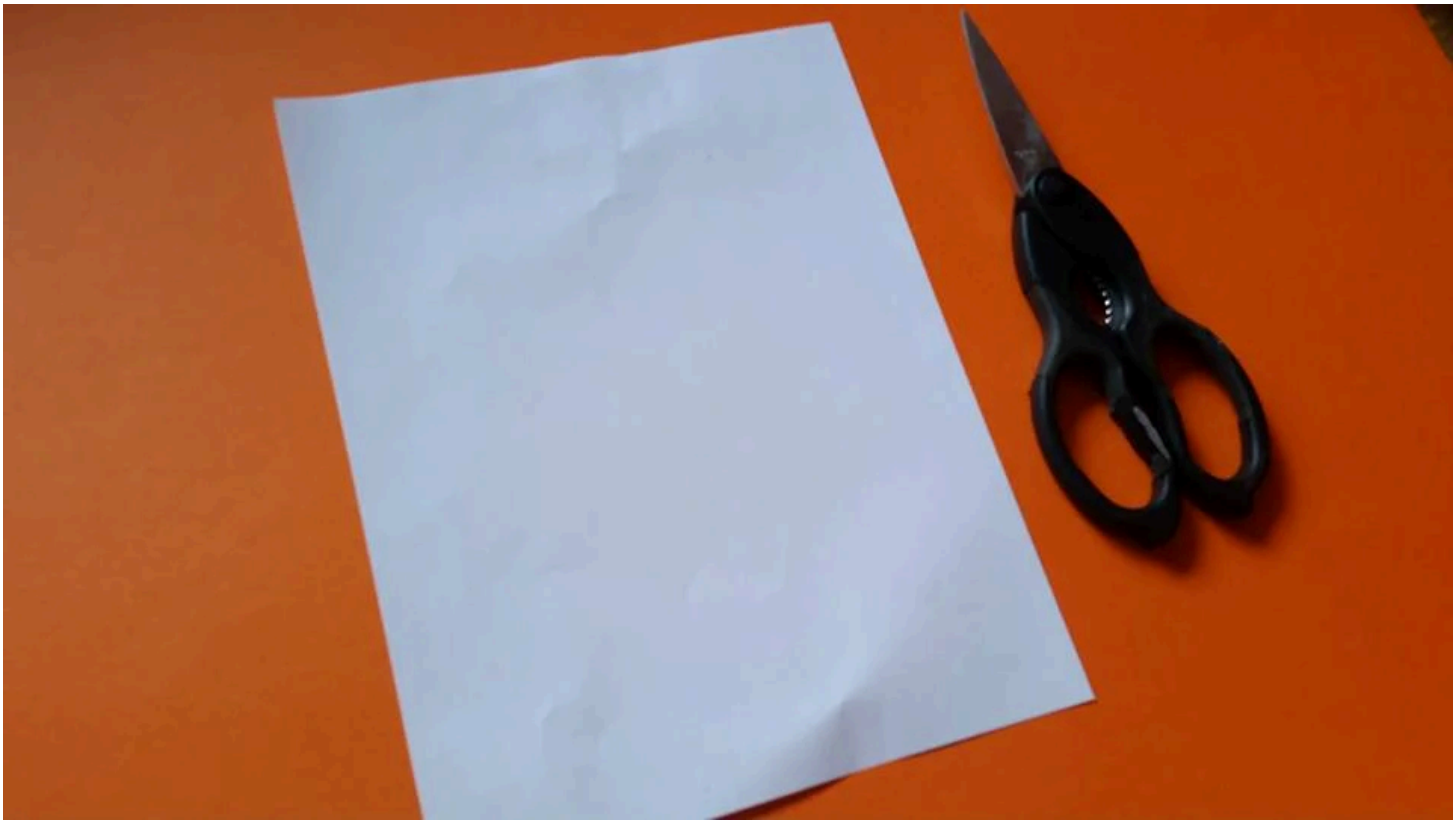
Introduction: An 8 Page Book From a Piece of Paper



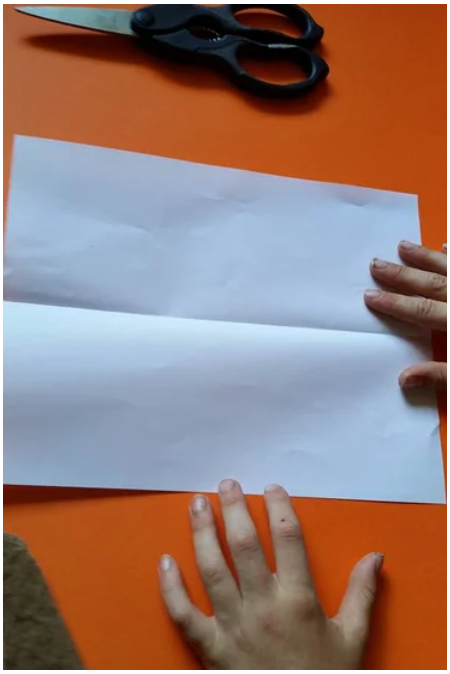
This little book made from a single page is useful for kids stories, note taking, or for planning larger books. Several can be glued or stapled together for a longer book. My kids have made many mini stories with these.

Step 1: Materials



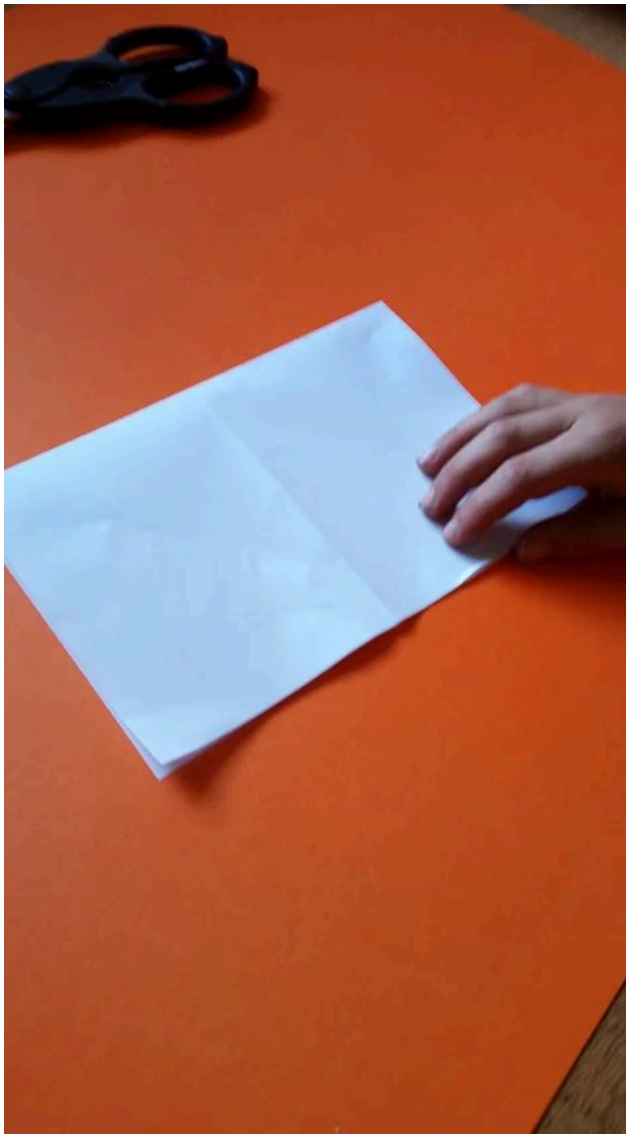
You need scissors and one piece of paper.

Step 2: Hot Dog Fold



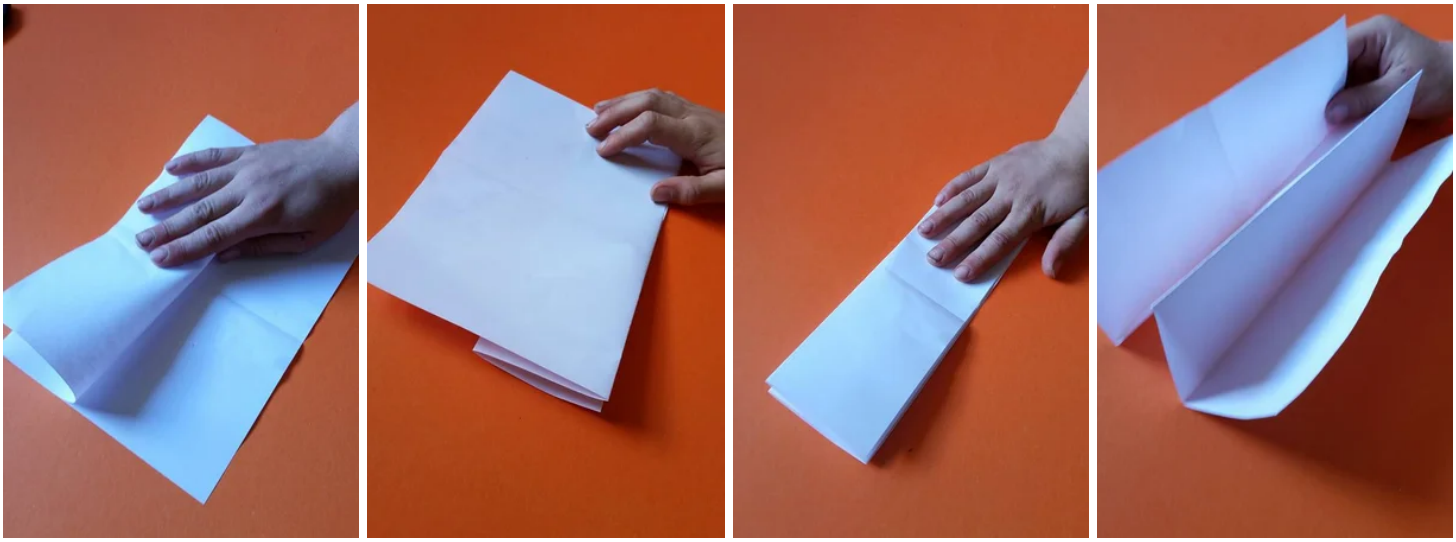
Fold the paper long ways and open it like a hot dog bun.

Step 3: Hamburger Fold



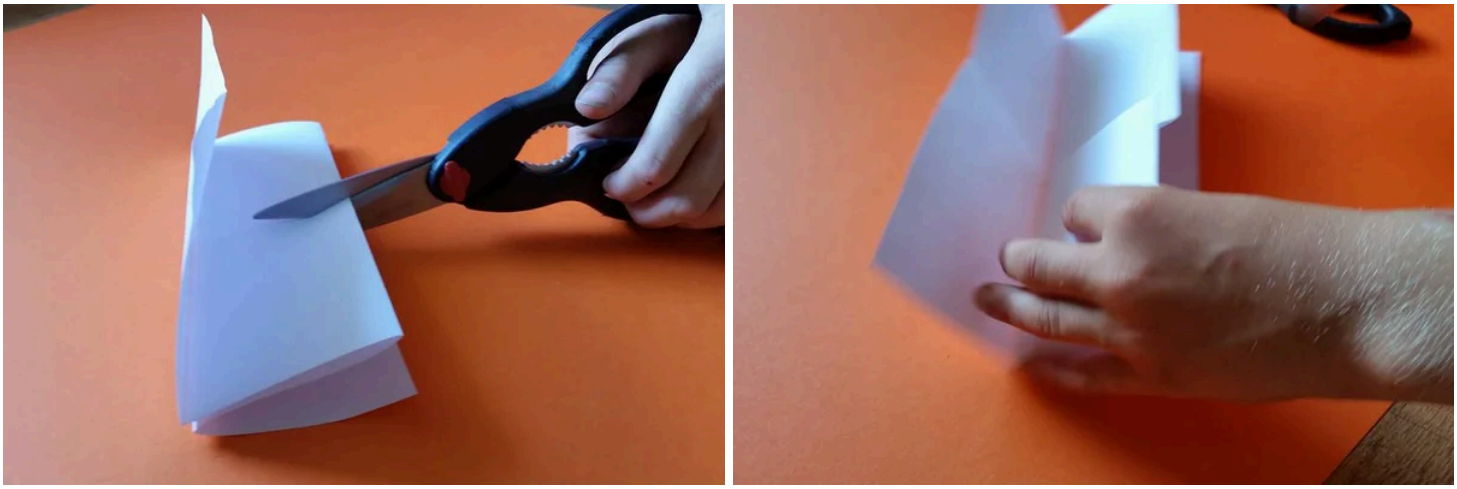
Fold the paper in half the other way.

Step 4: W Fold



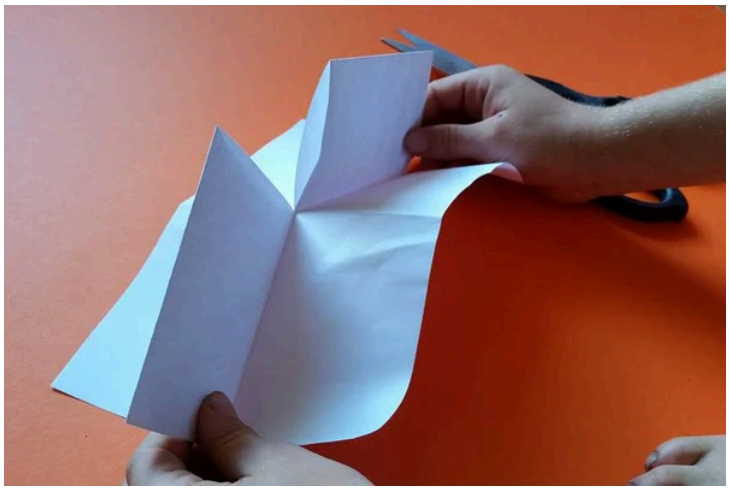
Fold one side back and flip it over and fold the other side back so when it is opened it looks like a W.

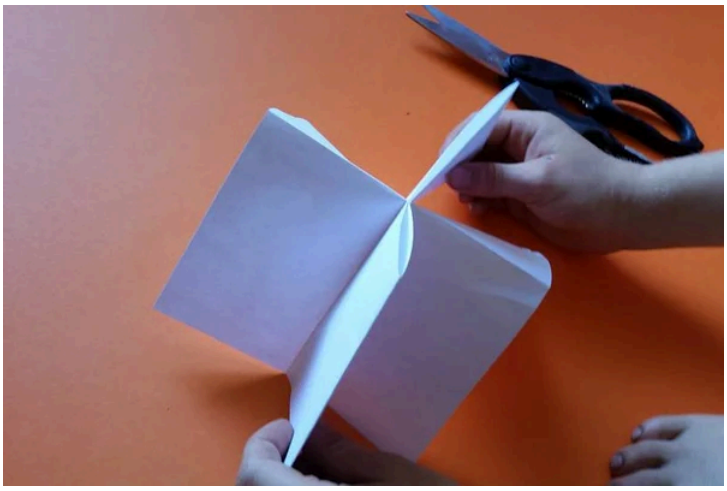
Step 5: Cut on the Middle Crease



Cut the paper on the middle crease that you made with the first fold.

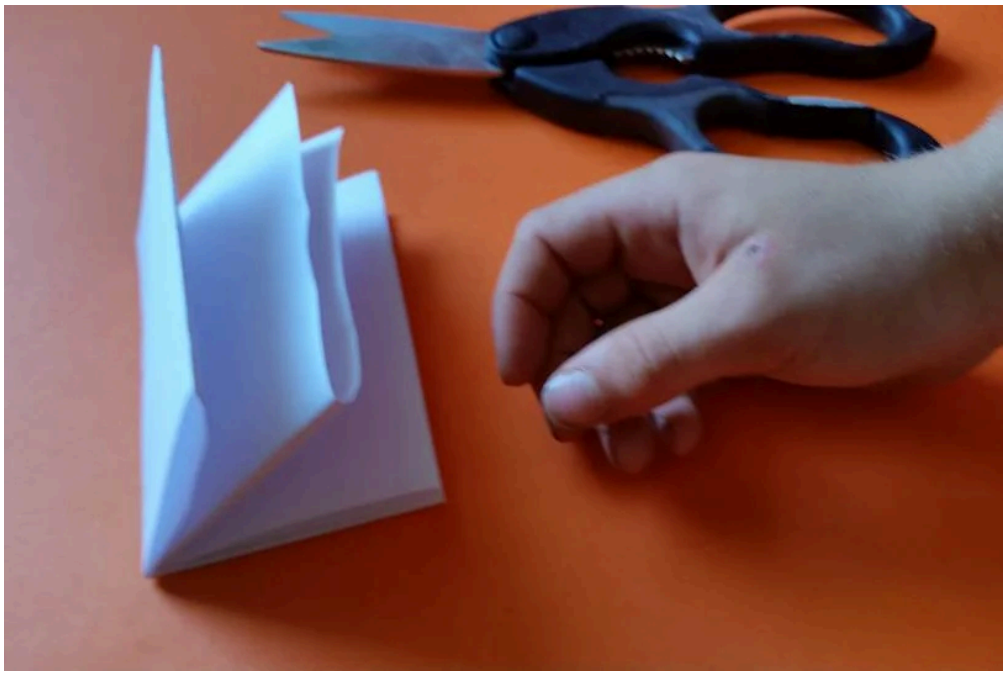
Step 6: Fold the Paper in Half





Fold the paper in half so it looks like an X on the end.

Step 7: Press Down the Book



Press down the pages to form your book. Write or draw what ever you like.
